Unit: Software Engineering Practice

Meeting: Introduction to the team and role selection

Date: 04 August 2026

Location: Microsoft Teams

Prepared by: Trinh Hieu Tran

Attendees

- Trinh Hieu Tran
- Pooja Tiwari
- Prince Kumar Sah

Apologies

- None / [Name if absent]

Meeting Purpose

The purpose of this meeting was to introduce group members, discuss the Week 1 requirements, select each member’s primary and secondary roles, and confirm the initial responsibilities for the unit project work.

Agenda

- Introduce all group members.
- Review the Week 1 task requirements.
- Discuss available project roles.
- Select primary and secondary roles for each member.
- Confirm next steps for GitHub setup, weekly folders, and timesheet records.

Discussion Summary

Group members introduced themselves and briefly discussed their background, technical interests, and preferred areas of contribution. The group reviewed the available roles for the unit, including Developer, Database Administrator, Business Analyst, Report Analyst, Tester, and Data Analyst.

The group agreed that each person should select two different roles so that all key responsibilities are covered across the team. The selected role combinations were discussed based on role relevance and expected project workflow.

Role Allocation

	 Team Member	 Primary Role	 Secondary Role
1	Trinh Hieu Tran	Developer	Database Administrator

2	Pooja Tiwari	Business Analyst	Report Analyst
3	Prince Kumar Sah	Tester	Data Analyst

Decisions Made

- Each member will be responsible for two roles during the unit.
- The team will use Microsoft Teams for group communication and meetings.
- Weekly work evidence will be recorded through meeting minutes, timesheets, and GitHub commits.
- Each member will prepare individual Week 1 evidence based on their selected roles.
- The group will hold a second Week 1 meeting to discuss role research, required skills/tools, learning resources, and next steps.
