

MEETING MINUTES

DATE: SEP 1, 2026

Attendees

- Krishna Sapkota
- Nikesh Shrestha

Agenda

- Review database implementation
- Discuss SQL queries and testing
- Review database validation and performance
- Share progress between DBA members

Updates

- Database tables, keys, and relationships were implemented and reviewed.
- Sample data was added to test the database structure.
- CRUD operations and JOIN queries were developed and tested.
- Database constraints were tested using valid and invalid data.
- Advanced queries for shifts, expenses, budgets, savings goals, and work hours were reviewed.
- Database performance and indexing requirements were discussed.

Action Items

- Complete database validation and testing.
- Refine and optimise SQL queries.
- Review and implement suitable database indexes.
- Finalise database documentation and testing results.
- Coordinate with developers for backend integration.

Final Announcements

- DBA members will complete the remaining database testing and documentation.
- The database will be prepared for backend/application integration.
- Team members should complete their assigned tasks and report any remaining database issues before the next meeting.
