Updates

Jenish Gurung

Reviewed and refined the BRD and SRS based on team feedback from last week's report review.
Continued building the project report, incorporating the Context Diagram and UML diagrams into the final structure.
Began drafting the architecture and technology sections using the Week 5 concept briefing as a base.
Coordinated with the team to align report formatting and terminology across sections.

Simran Chauhan

Started building visualisations in Tableau based on the finalised BRD and diagrams.
Connected and cleaned the dataset needed for the Tableau dashboard.
Began mapping report requirements to the specific charts and views needed in Tableau.

Pooja Tiwari

Started building the Power BI report, using the finalised BRD and diagrams as the basis.
Set up the initial data model and connections in Power BI.
Began identifying the key metrics and visuals needed to meet the reporting requirements.

Amsh Shrestha

Started on his assigned reporting task, using the finalised BRD and diagrams as the starting point.
Reviewed the report structure to identify where his section fits.
Set up his working files and tools ahead of building it out.

Outcome

Progress on the Tableau and Power BI builds was reviewed across the team.
Report sections in progress were shared for early feedback.
Report structure and formatting approach were confirmed for consistency across tools.
Further build-out and consolidation will continue next week.
